Subject: Microsoft suite

Along with EVERY one of my co workers, friends and family are getting pretty fed up with this government lawsuit. Its NOT about protecting the consumers, it's about giving Microsoft competitors UNFAIR advantage against MS, so that they do not have to spend research money of their own. LET THE INDUSTRY AND THE CONSUMERS DETERMINE IF THEY ARE BEING HURT. Making MS software "open" would create chaos for the vast majority of consumers. There would be NO stability or responsibility.

Quit spending our taxpayers money on this lawsuit and let the companies get on with business.
